

Patient Result System (PRS)

PRS is an accurate, innovative way...

...for your patients to retrieve their normal pap results at any time. This helps your clinical staff by reducing the number of patient calls inquiring about laboratory test results or the time consuming and costly task of mailing postcards from your office. Abnormal pap result calls will be referred to your office for an explanation of diagnosis.

This useful delivery system is available to your office free of charge. Pathology Reference Lab continues to look for better ways to enhance your patient care and help make your office management more efficient.

Follow these directions to see how simple it is for patients to retrieve results

- 1 Using a touch-tone phone, dial:
(210) 212-2211 or,
(866) 227-7731 toll-free
- 2 Enter the sample social security number listed for:

Normal Result	123456789
Abnormal Result	123456788
Result Not Ready	123456777

If you would like to order PRS for your office, contact your PRL representative or call our main number.
